#### <u>ISSUE</u>

Whether <u>LLC</u> may rely on the safe harbor in Rev. Proc. 2007-65, 2007-2 C.B. 967, with respect to § 48 energy credits.

#### **CONCLUSION**

Rev. Proc. 2007-65 does not apply to partners or partnerships with § 48 energy credits. Further, <u>LLC</u> does not satisfy all of the safe harbor requirements of Rev. Proc. 2007-65.

#### **FACTS**

## <u>Transactions Relating to Solar Generators</u>

<u>LLC</u>, a <u>State 1</u> limited liability company, was formed on <u>Date 1</u>. On <u>Date 2</u>, <u>LLC</u> entered into three agreements. First, <u>LLC</u> entered into a purchase agreement with <u>S1</u>, a <u>State 1</u> corporation that is classified as an S corporation, to acquire <u>a</u> solar generators at a purchase price of <u>\$A</u>. Individuals <u>A</u> and <u>B</u> own <u>A%</u> and <u>B%</u> of <u>S1</u>, respectively. The purchase was financed by a <u>\$B</u> loan from <u>S1</u>, as discussed in the next paragraph. <u>DRE</u>'s capital contributions to <u>LLC</u>, as discussed below, financed the balance of the purchase price. Under the purchase agreement, <u>S1</u> agrees to indemnify and hold <u>LLC</u> harmless from and against any loss, lawsuit, liability, damage, cost and expense

(including reasonable attorneys' fees) which arise out of or result from (i) claims by third parties against <u>LLC</u> that the solar generators has caused damage to property or bodily injury; (ii) claims by third parties against <u>LLC</u> that has now or ever infringed, violated, or misappropriated the intellectual property of any other person; (iii) any defects in the solar generators; and (iv) the inaccuracy or breach of any representation, warranty or covenant of <u>S1</u> contained in or made pursuant to the agreement. <u>S1</u> also represents that all of the solar generators constitute "energy property" as defined in section 48(a)(3) of the Internal Revenue Code and that no portion of the solar generators must be excluded from basis in determining the amount of energy credit available with respect to the solar generators under section 48(a).

Second, <u>LLC</u> gave <u>S1</u> a promissory note to pay for the solar generators on <u>Date 2</u>. Under the note, <u>LLC</u> is to pay <u>S1 \$C</u> per month for <u>b</u> months. As security, <u>LLC</u> gave <u>S1</u> a security interest in the solar generators and any proceeds of the rents received by <u>LLC</u> under the lease agreement discussed in the next paragraph. The note provides that <u>LLC</u>'s members, officers, directors, or managers do not have any personal liability for any of the obligations under the note. <u>S1</u> agrees that upon a default that it will look solely to <u>LLC</u> and collateral pledged by <u>LLC</u> in support of <u>LLC</u>'s obligations.

Third, <u>LLC</u> entered into a lease agreement with <u>S2</u>, a <u>State 1</u> corporation that is classified as an S corporation, to lease all of <u>LLC</u>'s solar generators. Related individuals, <u>A</u> and <u>C</u> respectively own <u>C%</u> and <u>D%</u> of <u>S2</u>. The lease term begins on <u>Date 3</u>. Pursuant to the lease, <u>S2</u> was responsible for the maintenance and repair of the solar generators. <u>S2</u> also ensures that the solar generators are operational and capable of producing solar energy at all times throughout the lease's rental term, which was for <u>c</u> months. The amount of rent was <u>\$D</u> per month. Under the lease agreement, <u>S2</u> agrees to indemnify <u>LLC</u> for all liability, obligations, losses, damages, penalties, claims, suits, costs and expenses, including attorneys' fees, arising out of or related to the possession, leasing, renting, operation, maintenance, repair, control, or use of the solar generators.

## Structure of LLC

On <u>Date 2</u>, <u>DRE</u> and <u>S3</u> entered into a written agreement regarding <u>LLC</u>'s operation. <u>DRE</u>, a <u>State 2</u> limited liability company, owns <u>E%</u> of <u>LLC</u>. <u>DRE</u> is wholly-owned by <u>D</u>, an individual. <u>S3</u>, a <u>State 1</u> corporation that is classified as an S corporation, owns the remaining <u>F%</u>. Individuals <u>A</u> and <u>E</u> own <u>A%</u> and <u>B%</u> of <u>S3</u>, respectively. The purpose of <u>LLC</u> is to acquire and lease solar generators.

<u>DRE</u> is obligated to make capital contributions to <u>LLC</u> projected to equal  $\underline{\$E}$  in three installments. The first installment in the amount of  $\underline{\$F}$  is payable on <u>Date 2</u>. The second installment in the amount of  $\underline{\$G}$  is payable on the date the solar generators are placed in service. The third installment in the amount of  $\underline{\$H}$  is payable upon <u>DRE</u>'s receipt of the Schedule K-1 for <u>Year</u>. As a condition precedent to <u>DRE</u>'s obligation to contribute the second and third installments, S3 must certify that (1) the use and

operation of the solar generators in all material respects complies with section 48 and that the solar generators have been placed in service for purposes of claiming the tax credit and have been delivered to <u>S2</u> under the lease agreement (described above); (2) no default has occurred; (3) no bankruptcy has occurred; (4) <u>S3</u> is not in breach of any provision under the <u>LLC</u> agreement; (5) that <u>DRE</u> will have sufficient basis in <u>LLC</u> and capital account balance and share of minimum gain to claim its full proportionate share of the tax credits and 100% bonus depreciation in the year the solar generators are placed in service; and (6) <u>LLC</u> continues to own the solar generators. <u>DRE</u> will defer its capital contributions if these requirements are not met.

The amount of <u>DRE</u>'s capital contribution to <u>LLC</u> was designed to equal for each dollar of Federal energy credits <u>LLC</u> expected to receive. If the energy credits were less than anticipated, then  $\underline{S3}$  would contribute  $\underline{E\%}$  of the tax credit shortfall (the adjustment payment) and an amount equal to interest on such amount at the "short term applicable federal rate" plus basis points, but not more than per annum from  $\underline{Date\ 4}$  until the date of the adjustment payment.  $\underline{LLC}$  would subsequently distribute this total to  $\underline{DRE}$ . If the energy credits were greater than anticipated, then  $\underline{DRE}$  would contribute an amount equal to  $\underline{G\%}$  of  $\underline{E\%}$  of the tax credit excess.

In the event the amount of the energy credits varies because of an IRS audit, the <u>LLC</u> agreement treats the variation as a tax credit shortfall or tax credit excess under the agreement. If the energy credits allocated to <u>DRE</u> are recaptured, <u>S3</u> would contribute to <u>LLC</u> an amount equal to the recapture. <u>LLC</u> would subsequently distribute this amount to <u>DRE</u>. If the solar generators were placed in service prior to <u>DRE</u>'s admission into <u>LLC</u>, <u>S3</u> would purchase <u>DRE</u>'s interest for an amount equal to <u>DRE</u>'s total capital contributions plus interest.

From <u>Date 2</u> through <u>Date 5</u>, items of income, loss, and credit are allocated <u>E%</u> and <u>F%</u> to <u>DRE</u> and <u>S3</u>, respectively. After <u>Date 5</u>, the allocations are <u>H%</u> and <u>I%</u> to <u>DRE</u> and <u>S3</u>, respectively.

Through <u>Date 5</u>, <u>DRE</u> is entitled to a <u>\$1</u> preferred annual distribution. An irrevocable and automatically renewable letter of credit issued by a bank reasonably acceptable to <u>DRE</u> guarantees the preferred distribution. <u>S3</u> does not receive a preferred distribution. In addition, for each year <u>DRE</u> is a member of <u>LLC</u>, <u>DRE</u> is entitled to an annual asset management fee of <u>\$H</u> per annum to cover costs associated with visits to the solar generators and for other asset management tasks.

The <u>LLC</u> agreement allocates net income and loss and credits in accordance with the members' ownership interest. Through <u>Date 5</u>, <u>LLC</u> will distribute cash as follows:

- Payment of DRE's preferred annual distribution:
- Payment to <u>DRE</u> for any amounts distributable and/or due and payable to <u>DRE</u> because <u>DRE</u> indemnified <u>S3</u> or there is a tax credit shortfall;

- Payment to <u>DRE</u> for any portion of the asset management fee for any prior year and the current year which has not been paid in full;
- Payment to S3 for any operating deficit loans; and
- The balance is distributed E% to DRE and F% to S3.

From and after <u>Date 5</u>, <u>LLC</u> distributes cash the same as above, except there is no preferred annual distribution to <u>DRE</u>, and the balance is distributed <u>H%</u> to <u>DRE</u> and <u>I%</u> to S3.

# Put and Call Options

<u>S3</u> has a call option to purchase <u>DRE</u>'s interest in <u>LLC</u>. <u>S3</u> may exercise the call option on <u>Date 6</u>, which is 90 days after <u>Date 5</u>. The price of the call option is equal to the fair market value of <u>DRE</u>'s interest.

<u>DRE</u> has a put option to have its interest redeemed by <u>LLC</u>. <u>DRE</u> may exercise its option on <u>Date 7</u>, one year after <u>Date 6</u>. If <u>DRE</u> exercises its option, <u>LLC</u> will distribute to <u>DRE E%</u> of distributable cash until <u>DRE</u> has been distributed, on a cumulative basis, cash equal to the lesser of the fair market value of <u>DRE</u>'s interest or the positive amount of DRE's capital account.

### Risks and Responsibilities of the Members

 $\underline{S3}$  is the managing member of  $\underline{LLC}$ , while  $\underline{DRE}$  is the investor member. The  $\underline{LLC}$  agreement vests in  $\underline{S3}$  all authority, rights and powers conferred by law, and those required or appropriate to the management of  $\underline{LLC}$ 's business.  $\underline{S3}$  is also obligated to adequately insure the assets of  $\underline{LLC}$ , as well as obtaining insurance for the value of the energy credits.  $\underline{S3}$  will take any action required to insure the solar generators will initially qualify and continue to qualify for energy credits and to avoid recapture or reduction of the energy credits or the imposition of penalties or interest on  $\underline{LLC}$  or its members for failure to comply with section 48.

If at any time before <u>Date 5</u>, an operating deficit exists or there is insufficient cash to make the annual preferred distribution to <u>DRE</u>, then <u>S3</u> will make a loan to <u>LLC</u> equal to the operating deficit. The loan would be non-interest bearing and is only repayable from <u>LLC</u>'s distributable cash.

All liabilities are nonrecourse to <u>DRE</u>. <u>DRE</u>'s liability is limited to its capital contributions. It has no other liability to contribute money to <u>LLC</u>. It is not obligated to make loans to <u>LLC</u>.

## **LAW AND ANALYSIS**

Section 48(a) provides for an energy credit equal to 30 percent of the cost basis of qualifying solar energy property placed in service before January 1, 2017.

In 2007, the IRS issued Rev. Proc. 2007-65, 2007-45 I.R.B. 967, to set forth a safe harbor under which the IRS will respect the allocation of § 45 wind energy production tax credits by partnerships in accordance with § 704(b). The revenue procedure applies only to partners or partnerships with § 45 production tax credits from renewable sources from wind. Thus, the revenue procedure does not apply to any other tax credits. Among the safe harbor requirements are: (1) at least 75 percent of the fixed capital contributions plus reasonably anticipated contingent capital contributions to be contributed by the investor with respect to an interest in the partnership must be fixed and determinable obligations that are not contingent in amount or certainty of payment; (2) the investor may not have a contractual right to cause any party to purchase its partnership interest in the partnership; and (3) the investor may not be the beneficiary of a guarantee of a tax credit allocation, but rather must bear the risk that the partnership's activities do not give rise to an anticipated amount of credit.

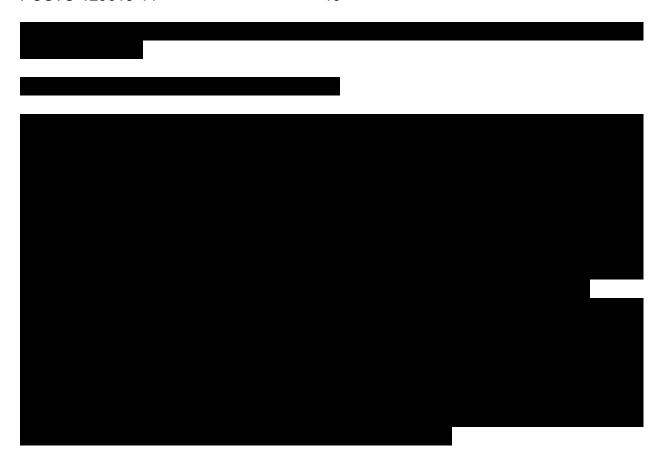

Rev. Proc. 2007-65 does not apply to partners or partnerships with § 48 energy credits. Rev. Proc. 2007-65 clearly provides that the safe harbor only applies to partners or partnerships with § 45 wind energy production tax credits. In addition, Rev. Proc. 2007-65 applies to a production tax credit, the amount of which varies over time based on how much wind energy the partnership produces. The requirements of such a credit are different than an investment tax credit, such as the § 48 energy credit, which is an upfront credit. That permits the investor to recover its initial investment much more quickly than an investor receiving a production tax credit. Thus, <u>LLC</u> cannot use the safe harbor provided by Rev. Proc. 2007-65 for support that the IRS should respect its allocation of § 48 energy credits to DRE.

Although Rev. Proc. 2007-65 is not applicable, <u>LLC</u> does not meet all of the requirements of the safe harbor. First, of <u>DRE</u>'s capital contributions that it makes in three installments, only <u>DRE</u>'s first installment is fixed and determinable. The amount of the first installment, <u>\$F</u> is less than 75% of its total expected contribution, <u>\$E</u>. Second, <u>DRE</u> has a contractual right to have <u>LLC</u> to redeem its interest. Third, <u>DRE</u> does not bear the risk that <u>LLC</u>'s activities do not give rise to an anticipated credit amount. In the event <u>LLC</u> generates credits less than expected, then <u>S3</u> contributes the shortfall, which <u>LLC</u> will subsequently distribute to <u>DRE</u>. Further, <u>S3</u> is obligated to purchase insurance in the amount of the total anticipated energy credits.

#### CASE DEVELOPMENT, HAZARDS AND OTHER CONSIDERATIONS
